DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 4 and 8 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Kaneko et al. (6,747,946).

Kaneko et al disclose in figure 11 a method for effectively pruning a FFT circuit by forcing the input signals (X[2]-X[4], X[6]-X[8], X[10]-X[12], and X[14]-X[8]) of predetermined butterfly modules to be pruned to zero (ground), which in turn clearly force the input signals of one or more butterfly modules of one or more successive computational states needed to be pruned to zero as claimed (see also figure 14).

3. Claims 1-3 and 5-7 are allowed.

4. Applicant's arguments filed on 02/01/2007 have been fully considered but they are not persuasive because it is so well known that connecting to a signal to a ground is to force the signal to have a value of zero. Further, it is clear from figure 14 that forcing the input signals X[2]-X[4], X[6]-X[8], X[10]-X[12], and X[14]-X[8] of predetermined butterfly modules or the

first stage to be pruned to zero (ground), also force the input signals of one or more butterfly modules of one or more successive computational stages needed to be pruned to zero.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuong D. Ngo whose telephone number is (571) 272-3731. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai An can be reached on (571) 272-3756. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
